CONTROL FOR MECHANICAL COMBINATION LOCK

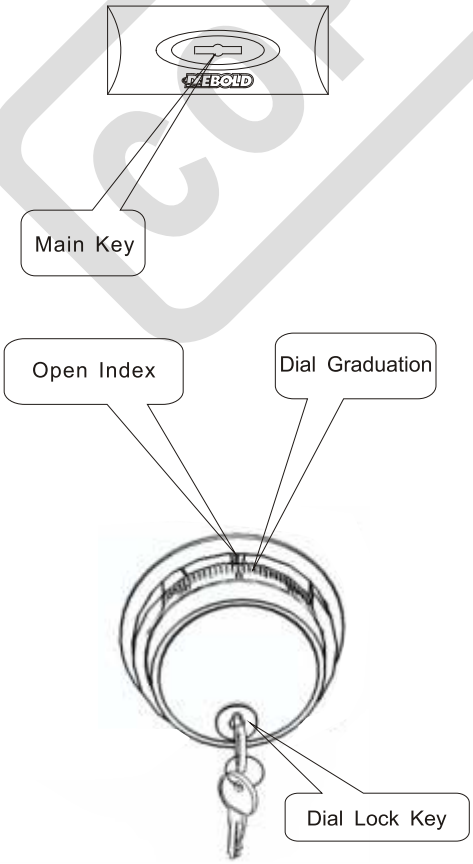

Figure 3

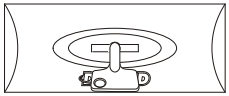
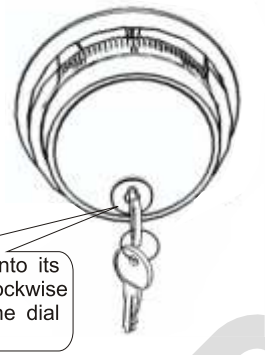
TO OPEN

☐ Step 1





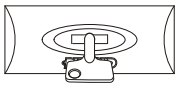
Insert the dial lock key into its keyhole, turn it counterclockwise by 180° to unlock the dial lock.

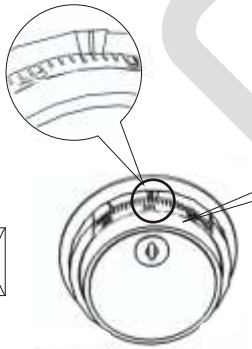
The factory combination for this container with mechanical combination lock your purchased is:

___, ___, ___°

The following unlocking procedure is illustrated with combination 46, 22, 51, as an example.

☐ Step 2



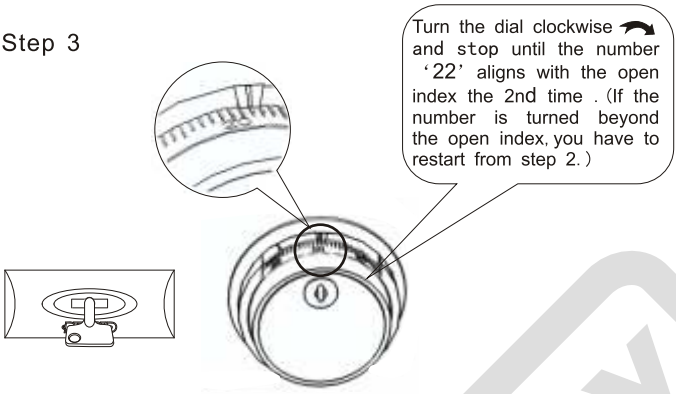


Turn the dial counterclockwise, and stop until the number '46' aligns with the open index the 3rd time or more. If the number is turned beyond the open index, you can turn the dial one more round to align with it, but don't turn the dial back to regain proper alignment.

It will be counted as one time when the number of the dial graduation is turned to open index.

TO OPEN

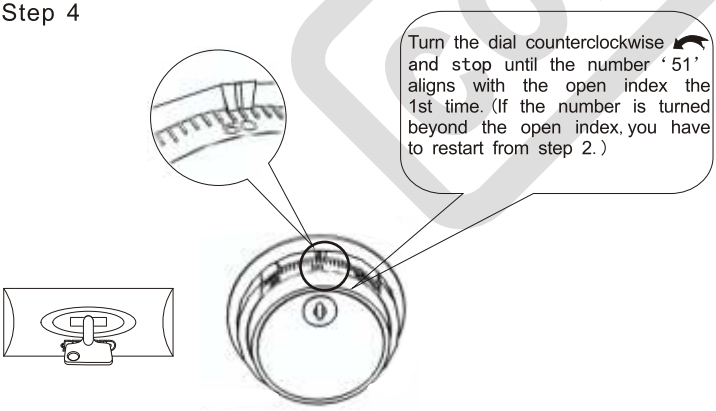
❑ Step 3



Turn the dial clockwise and stop until the number '22' aligns with the open index the 2nd time . (If the number is turned beyond the open index, you have to restart from step 2.)

It will be counted as one time when the dial is turned from the first combination number to the second combination number.

❑ Step 4



Turn the dial counterclockwise and stop until the number '51' aligns with the open index the 1st time. (If the number is turned beyond the open index, you have to restart from step 2.)

It will be counted as one time when the dial is turned from the second combination number to the third combination number.

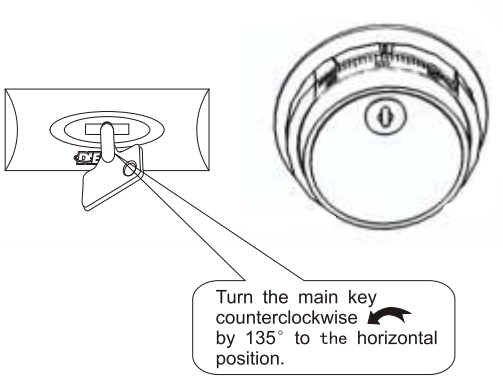
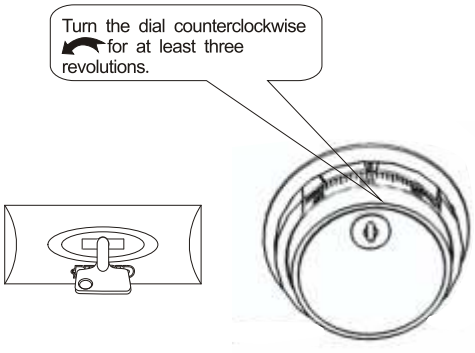
TO CLOSE

☐ Step 1: Close the door. (see Figure 1)

☐ Step 2

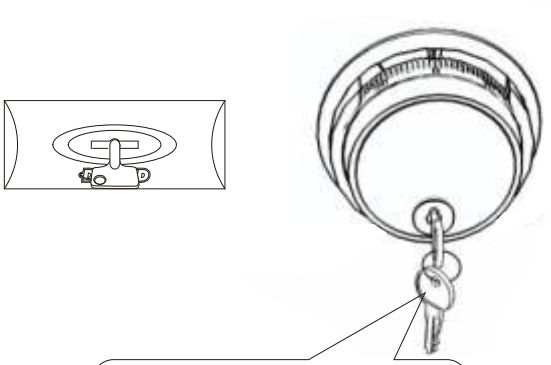


☐ Step 3



TO CLOSE

☐ Step 4



Align the number '0' on the dial with the open index, then, insert dial lock key into its keyhole and turn it clockwise by 180° to close the dial lock.

Note:

Be sure to remove the dial lock key after closing and locking the container!

Although the combination for this product can't be changed, but it is very safe for you to use it as it was generated at random.

TO BOLT DOWN THE CONTAINER

Place the container where it be installed. Mark the locations of the bolt-down holes. Move aside the container and drill the holes suitable diameter and depth in the marked locations. Put and tighten the bolt-down bolts into the holes. Remove the nuts and washers. Replace the container where it will be installed and align the bolt-down holes. Install and tighten the washers and the nuts from inside the container.
